Summary

Applied AI and Machine Learning Engineer with hands-on experience building and deploying end-to-end ML and NLP systems that drive product efficiency and business outcomes. Focused on building robust, production-ready AI systems that accelerate company growth and solve real-world problems.

Education

B.Tech in Computer Science and Engineering, CGPA: 6.26 **2023-2027**

Galgotias University, Gautam Buddha Nagar

Class XII: 70% **2022-2023**

JKG International School, Ghaziabad

Class X: 87% **2020-2021**

JKG International School, Ghaziabad

Skills

Programming Languages: Python, SQL

AI/ML: Machine Learning, Deep Learning, Feature Engineering, Model Evaluation, Natural Language Processing, Transformers, Scikit-learn, TensorFlow

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Tools & Frameworks: Git, GitHub, Flask, FastAPI, REST APIs, Streamlit

Soft Skills: Teamwork, Analytical Problem Solving, Communication

Projects

MeetSync – AI Meeting Minutes Generator | *Live Demo* | *Tech: Python, Flask, NLP* **January 2025**

- AI system to convert meeting audio into structured minutes (topics, decisions, action items).
- Integrated Deepgram API for speech-to-text and Google Gemini for reasoning.
- Designed a Flask-based web app allowing users to upload audio and download summaries.
- Deployed on **Render**, reducing manual meeting note preparation effort by an estimated **80%**.

Energy Consumption Forecasting System | *Project Link* | *Tech: XGBoost, scikit-learn, Gradio* **August 2025**

- Built a time-series regression pipeline to forecast hourly energy consumption using **178,000+ records**.
- Engineered temporal and calendar features (hour, day, month) to capture consumption patterns across regions.
- Trained an **XGBoost regressor** using time-based (80/20) splits to prevent data leakage.
- Achieved strong predictive performance with **$R^2 = 0.92$** , **MAE ≈ 210** , and **RMSE ≈ 269** on test data.

Internships

AI Azure Virtual Internship (Microsoft & Eduskills, AICTE) **July 2025**

- Performed data cleaning, EDA, and feature engineering on the Algerian Forest Fires dataset.
- Implemented and compared Linear, Lasso, and Ridge Regression models; achieved an **R^2 score of 0.98**.

Certifications

- Microsoft AI Azure Virtual Intern - Microsoft, Eduskills *Link*
- Data Science/Analysis - Pregrad *Link*
- Python Programming Certificate - HackerRank *Link*

Achievements

- **Hackaccino 3.0 National Hackathon:** Developed a data-driven women's safety platform in a team of 5, that predicted area-wise risk levels using historical crime datasets; secured **17th place among 194 teams**.
- **NASA Space Apps Challenge:** Designed and built an interactive educational web platform in a team to simplify exoplanet science for ages 5–15, translating exoplanet concepts into engaging visual explanations.
